Help us, **help the planet**, by recycling your printer toner for free!

We are excited to announce the launch of our new innovative and sustainable, 100% recyclable toner facility. Issues around climate change are extremely prominent at the moment and it is time for all of us to think about how we can play our part in helping the environment and protecting our planet.

How can I **recycle my toner**?

Step 1

When the toner runs out, keep hold of the empty cartridge

Step 2

The next time our Service Team Engineers or Account Manager visits, pass them on

Step 3

Our Operations Team will then return these to our supplier

Step 4

These will then be cleaned, refilled and therefore 100% recyclable!

We will collect them during routine visits only, as extra trips would have a negative impact on our carbon footprint. Please do not call us to collect the empty cartridges.

With our UTAx A3 Multifunctional Devices, your empty black toner cartridge can be transformed into a waste toner bottle, another sustainable solution to reduce waste.

What are the environmental benefits?

Our new facility will significantly reduce the number of cartridges going to landfill sites that are extremely harmful to the environment. As the cartridges are totally reusable, there is also no air or water pollution that comes from manufacturing the new products.

Did you know...

In some cases toner cartridges can take up to 1000 years to decompose in harmful landfill sites.

Give your toner a new lease of life by recycling it instead and we will ensure 100% of your cartridge will be used again!
